

Quick Flash

Preparation:

- Print cards
- Cut out cards on the dotted line

How to Play:

Select a card and show your child for a few seconds (5-10)

Ask, “How many dots did you see?”

The goal is for your child to see the number of dots and recognize the quantity without counting (subitizing).

Adjust the time you show the card depending on whether it is too quick *or too long*

(the child didn't have time to recognize the quantity OR the child had time to count the quantity one by one)
